"THE foxes are eating up the churches of Williamstown," eh? So quoth the WATCHMAN last week. Not so. They have not degenerated into fox timber, yet, if some one may think he discovers, now and again, streaks of foxiness in them. When that item started on its telephonic journey to the WATCHMAN office, it was "turkeys," and not "churches" that were the 'turkeys,' and not'

It has before been itemized that one of our townsmen willed his farm and some other property to the church and society to which he belonged. They were to come into possession of it upon the death of his wife, and by the terms of his will, are to hold the farm perpetually for the benefit of the society. petually for the benefit of the society. It is supposed that these conditions were imposed after mature deliberation on the part of the donor. It is now currently reported here that our probate judge, now that the wife is dead, insists that the farm can be sold, and the money therefor be invested for the society's new without any solution of the world the use, without any violation of the spirit of the will, and that it ought to be done for the best interests of the society. Of course, the only justification for such proceeding would be that justification for such proceeding would of the the donor had at least the highest good of the color, but failed to choose the wisest way in society, but failed to choose the wisest way in which to minister to it. It is said that the con-sent of our supreme court to such a course would make it duly valid, in law. There may be a suggestion in all this to persons thinking of similar wills, when much wisdom surely is needed. In this case the donor was a liberal giver in his lifetime. But are there not too feare giving as they ought while living, and better be the "executors" of their own if they are cherishing generous purpose

in the line of giving sometime? OUR Episcopal brethren will surely enjoy the following genuine occurrence, with the rest of us. Among our acquaintances is a Congregational widow, the mother of a fair sized family of children, the oldest of whom was married to the Episcopal clergyman of the place. Rather naturally, perhaps, the young rector's wife was desirous of getting a brother, a lad of twelve or fourteen years, into the Episcopal fold. Johnnie had been persuaded into the Sunday-school, and was getting somewhat familiar with a term not heard in the Congregational service, but constantly in the Episcopal services, viz., "the collect," which the dictionary defines as "the collect," which the dictionary defines as "a short prayer; a prayer adapted to a particular day or occasion, and read together with other parts of the church service." Now it happened one day, in the boy's school of which Johnnie was a pupil, that the word "colic" was given his spelling class, every boy of which failed to spell it correctly. Astonished, the teacher exclaimed, "Why, boys, not one of you able to spell 'colic'! Do you know what it is?" Thereupon Johnnie's arm was extended and set to wagging vigorously, and at the same time he began to wnisper loudly, "I know what it is, teacher, I know what it is." "Well, Johnnie," said the teacher, "what is it?" to which he replied, "It is what the Episcopais have," of course confounding the words "collect" and "colic."

He was gone all day and Mr. Gove charged for the team accordingly. Mr. Sweeney was drunk and refused to pay. Officer Bates arrested him and held him in custody in Mr. Gove's stable office. When the afternoon train north came in, the prisoner wanted to go, but Mr. Bates urged him to stay, in the hospitable encounter the door was smashed and things turned topsy turvey. Mr. Sweeney went before Judge Lesse and paid about \$7 for his circus and was allowed to depart in peace, straightly admonished by the magistrate to sin no more.

INTELLIGENCE has been received of the death INTELLIGENCE has been received of the death in California, July 24th, of Mr. George J. Colby, formerly a resident and prominent citizen of this village. Mr. Colby was born in Richmond, Vermont, in May, 1835, the son of Arnold and Phebe Jewell Colby. In 1857 Mr. Colby came to Waterbury and with his brother Edwin engaged in a modest way in manufacturing. They began in the locality now known as Colbyville, to make children's carriages of willows, a business which ultimately developed into large proportions. Mr. Colby invented and perfected the first practicable clothes wringer which, known as the "Colby wringer," with improvements, still maintains its ascendency over its numerous rivals. The Colby brothers manufactured the wringer in connection with children's carriages, and through various fortunes their business increased till tion with children's carriages, and through various fortunes their business increased till they formed the stock company known as Goloy Brothers & Company, built extensive shops, employed a large force of workmen and sold their goods all over the world. Their wares were of conceded merit, and the brothers displayed skill and enterprise, in devising, manufacturing and trading. In 1863 Mr. Colby after a long sickness suffered complete paralysis of his lower limbs. His mind retained its vigor and as president of the company he directed its affairs till the business passed into other hands. He made frequent but unavailing efforts for the recovery of the use of his paralyzed limbs. His later life was a long conflict with suffering and misfortunes. He moved to Michigan in 1873 where in feeble health he lived till, after a short residence near Chicago, in November last he went to California where his sisters are residing. Mr. Colby was a large-hearted man, of a kind and genial nature, enthusiastic in his enterprises and liberal in the bestowal of his means. He has many friends in Vermont who will hear of has many friends in Vermont who will hear of his death with unfeigned sadness.

DR. E. J. FOSTER has finally concluded to remain here and practice his profession. The age of his father makes it seem necessary that one of the children should remain at home, one of the children should remain at home, and the doctor has consented to defer his return to the West, and will stay with his father. The doctor is a skillful physician of the homeopathic school, and a gentleman whom all will be glad to retain among us.

"I whore my nephew in New Hampshire," said farmer Hoegood, "that he better come and attend the Green Mountain seminary next fall. I told him that the institution had been struck by a cyclone, which knocked a great hole in the ground, and a three-story boarding house sprang right up out of the hole." It was suggested that he meant a boom instead of a cyclone. "Well," replied Hoegood, "mebbe it was a boom, I know it was some-thing rowerful and they say that a cyclone thing powerful, and they say that a cyclone has a heap of power." It is a fact that the Green Mountain seminary at Waterbury Center is beginning to experience the effects of genuine boom. Sometimes a boom comes with the beginning of an enterprise, sometimes not at all, but more frequently after years of wait-ing. The latter is the case with the seminary. Sometimes a boom comes with The new boarding house is not by any means the boom; it is only one of the many effects of the boom. The boom is manifest in the largely increased demand for accommodations, and the prospect is that all the rooms in the new boarding house will be occupied the com-ing term. As further evidence of the boom it ing term. As further evidence of the boom it is gratifying to chronicle a gift from Hon. W. S. Hobart of San Francisco, a native of Waterbury, who has just sent his check for \$1000 towards the completion of the boarding house. This generous gift is highly appreciated by Miss Colley, the principal, and by the citizens at large.
